

Software

You can send your data as a pdf, eps, jpg, tif, ai, fh10, or dwg file.

Please observe the following recommendations:

Photoshop:

We accept the images without text as RAW, psd, tif (with LZW compression), or jpg.

Illustrator, InDesign, Freehand10:

Convert all text to frames and save the file as a pdf or eps.

Data creation

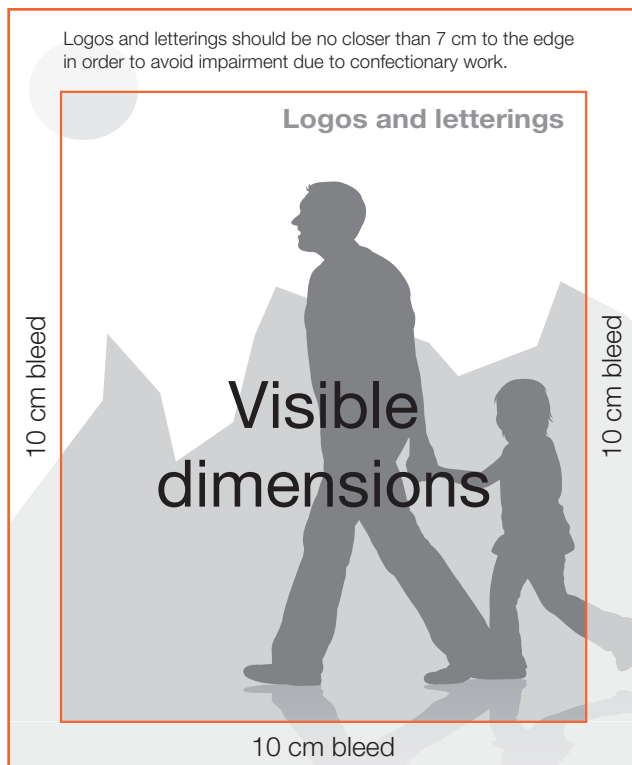

Design a pdf or eps with all text covered to frames on a scale of 1:10.

Please observe that an additional 10 cm bleed all around is needed.

Edit and save the file with the **Coated Fogra39 Profile**.

Define spot colours in CMYK or Pantone, HKS etc.

Send us your proofs and layouts.

Resolution for Hi-Res printing

Picture size in qm	Resolution in DPI	File size in MB (ca.)
1	800	40
2	650	50
5	500	75
10	400	95
20	350	145
50	300	260
100	250	360

For special purposes in accordance to prior consultation.

Resolution for Airbrush printing

200 DPI on a 1:10 scale

Data transfer

You can send us your files via e-mail, CD/DVD or USB-stick. Compress the files with Stuffit or Winzip.

In addition you can transfer your files to our FTP-Server.

[ftp.bigimagesystems.com](ftp://bigimagesystems.com)

Username: clientde

Password: qwerty

Should you experience difficulties upon transferring the data you can download helpful tools free of charge at one of the following locations.

MAC users:

<http://fetchsoftworks.com/>

<http://www.panic.com/transmit/>

PC users:

<http://filezilla.en.softonic.com/>

Need assistance?

Should you need any support in creating your files please feel free to call us. We would be glad to create your layouts, digitalise and retouch your original artwork, or perform any other steps required to assure a maximum of satisfaction.
